ABDUR RAHMAN

GIS & Remote Sensing Analyst

Bahria Town Phase 7 Islamabad, Pakistan | +92 308 5971946 | abdurrahman08384@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

GIS Analyst with hands-on experience in spatial data management, remote sensing, satellite image processing, thematic mapping, and GIS-based modeling. Highly proficient in ArcMap, QGIS, Google Earth Engine (GEE), and Python-based automation, with practical expertise in flood suitability analysis, agricultural land suitability, groundwater assessment, site selection, property and parcel mapping, and zoning data. Skilled in NDVI, LULC analysis, georeferencing, digitization, thematic cartography, raster and vector processing, and spatial modeling. Successfully digitized 2,000+ zoning and parcel maps across the United States and Canada, supporting infrastructure planning, environmental assessment, agricultural development, disaster management, and energy-sector applications.

PROFESSIONAL EXPERIENCE

GIS Analyst | Nook Office Solutions Sep 2025 – Present

- Perform advanced spatial analysis and thematic mapping using ArcGIS and QGIS to support planning and development projects.
- Develop high-quality maps, spatial datasets, and analytical reports used directly in client and stakeholder decision-making.
- Manage geospatial data workflows including digitization and georeferencing of complex, multi-source datasets.
- Translate spatial analysis into clear, actionable insights for both technical and non-technical stakeholders.
- Digitized 2,000+ zoning/parcel maps, maintaining 90–95% spatial accuracy across all deliverables.
- Built a GIS data-extraction/scraping utility to streamline discovery of city-level GIS directory and service information from web-based mapping sources (code available on GitHub).

GIS Intern | ADC Office, Charsadda Mar 2024 – Aug 2024

- Produced thematic maps and spatial reports that informed district-level planning initiatives.
- Conducted geospatial data analysis to support administrative decision-making processes.
- Carried out digitization, georeferencing, and spatial database preparation for district records.
- Presented spatial findings clearly to both technical and non-technical stakeholders.

GIS Intern | Khyber Pakhtunkhwa Oil & Gas Company Ltd (KPOGCL) May 2023 – Dec 2023

- Assisted in GIS mapping and spatial data analysis for oil and gas exploration projects.
- Prepared georeferenced maps and technical spatial reports for exploration planning teams.
- Supported exploration and development planning through accurate, field-verified spatial datasets.
- Gained hands-on exposure to GIS applications in the energy sector.

KEY PROJECTS

- Groundwater Potential Zone Mapping — applied the Multiple Influence Factor (MIF) technique to identify high-potential recharge zones for district water-resource planning.
- Land Use & Land Cover Classification — classified satellite imagery to map land-use change and support urban planning decisions.
- NDVI-Based Vegetation Analysis and Change Detection — tracked vegetation health and change over time using multi-temporal satellite imagery.
- Municipal Zoning Map Preparation — produced zoning maps distinguishing residential, commercial, and agricultural areas.
- Watershed Analysis using DEM Data — delineated watershed boundaries and drainage patterns from digital elevation models.
- Spatial Data Collection — conducted field data collection using GPS, RTK, and structured survey methods.

- Suitable Site Selection Analysis — applied multi-criteria spatial analysis (e.g., slope, land use, proximity to infrastructure, and environmental constraints) in ArcGIS to identify and rank optimal sites for development projects.

EDUCATION

BS Geomatics (GIS & Remote Sensing) — University of Peshawar
2021 – 2025

Intermediate (Pre-Medical) — Ghazali Science College, Charsadda
2019 – 2021

Matriculation (Science) — Govt. Shaheed Rizwan Sareer Higher Secondary School, Utmanzai
2017 – 2019

TECHNICAL SKILLS

GIS & Remote Sensing Tools: ArcMap, ArcGIS Pro, QGIS, Google Earth Engine, Agisoft Metashape, Global Mapper

Spatial Analysis: Satellite Image Processing & Enhancement, NDVI & Vegetation Analysis, Georeferencing & Digitization, Watershed & Land Use/Land Cover Analysis

Programming & Data: Python for GIS, Spatial Data Analysis, Data Visualization

Other: Project Management, Cartographic Design, Report Preparation, MS Word & Excel

FIELD & SURVEY SKILLS

- Drone Data Processing
- GPS Survey and Real-Time Kinematics (RTK)
- Total Station & Leveling Survey
- Open & Closed Traverse Survey
- Kobo Toolbox & ODK for Data Collection

SOFT SKILLS

- Analytical Thinking, Problem Solving, Planning & Task Management, Communication & Presentation, Time Management, Field Coordination & Documentation

LANGUAGES

English | Urdu | Pashto
